

Classic

ON-AIR

CBT Systems' Classic "ON-AIR" Light has become the hottest light in the industry. Its timeless design reminds us of the good old days and its rugged construction ensures it will be around a lot longer. The aluminum housing is built using traditional sand casting methods, machined, and then polished to a chrome-like finish. A single 120V bulb or dual 12V bulbs can be used to illuminate the multilayered lexan lens which comes standard in either blue or red. The unit can be mounted horizontally or vertically.

CBT Systems' Classic and Dual Lens "ON-AIR" Lights can both be ordered online at www.cbtsystems.tv or by calling 858-536-2927.
